

How to clear the pairings on an IntaRide F1 Bluetooth headset.

- 1) Turn the unit ON
- 2) PRESS & HOLD the round control button “with the phone icon”, and turn it to the left (anti-clock)
- 3) Keep holding, the lights will go through various phases of Red/Blue, then the unit will shut down on it's own after about 8 seconds.
- 4) Let go the round control button, all pairings have been cleared.

When you next turn it on, the unit will likely go straight into pairing mode as it will have no remembered pairings.
